Westside Appliance Repair Now Services Gas Fireplaces
Local Appliance Repair Company Works On and Repairs Most Brands and Models of Gas Fireplaces

Des Moines, IA (**4/28/2016**) - Your fireplace is always on display. It is an integral part of your living room and often a main focal point in your home. As the weather gets warmer, now is the time to invest in your gas fireplace repair or preventative maintenance. Westside Appliance Repair just announced that the company now services and repairs gas fireplaces. Our well-trained service technicians will thoroughly inspect your fireplace to ensure that it is operating properly, and clean it inside and out to make it look and work like new.

While we all hope that it won't be fireplace weather anytime soon, May is a great time to spring clean your fireplace so you do not have to worry about it when the chilly fall season rolls around. Westside Appliance Repair repairs almost all brands and models of gas fireplaces.

Wondering how to know if your gas fireplace needs repair? If your fireplace displays one of the following symptoms, give Westside a call:
- Not lighting
- Flame going out
- Flames are too low
- No gas flow
- Flames are too high
- Smells of gas
- Smells bad
- Clicking
- Too much soot

If any of these symptoms are showing, or you have any other concerns, give us a call at 515-276-8899. We can fix it!

About Westside Appliance Repair:
