

## THE CHALLENGE

Manufacturing is full of innovation, creativity, and problem-solving – and **the next generation of makers, thinkers, and doers are in your classroom.**

Companies across Iowa and the U.S. will be looking for people with the skills to design, build, and improve the products that keep our world moving.

**The opportunities are endless** – from robotics and welding to engineering, technology, and business.

## THE INNOVATOR'S QUEST

- **A ready-to-use, gamified learning experience that brings the world of modern manufacturing to life** - no prep required.
- **Facilitated by local manufacturing professionals and volunteers**, giving your students meaningful, real-world career connections they can't get from a textbook.
- **Hands-on, story-driven challenges** that introduce key manufacturing concepts, essential skills, and career pathways—while **keeping students energized, curious and fully engaged.**
- **Easy to implement—portable, reusable, and scalable** for different classroom sizes, events, or after-school programs serving grades 4-9.

## LET'S BRING IT TO YOUR CLASSROOM!
